

I would like to state my support of the comment filed by H. Hans Brakob, KOHB and supported by others.

I would like to ammend Mr. Brakob's comment to allow Novice and Tech-Plus holders the permission to use the proposed "experimental reservation." This refarming will allow better utilization of the currently allocated spectrum and allow for experimentation on the lower frequencies. Allowing lower-classed amateurs the ability to use digital communications may very well entice them to upgrade and contribute to amateur radio as a whole.

Respectfully submitted,

Kenneth W. Linder KC7RAD (ex KA9RVK)
